

Current practice of mind mapping has limited power of intercommunication.

Most mind maps resemble personal notes not suitable for exchanging information with others.

Mind mapping could be so much more!

The potential of mind mapping is huge.

Learning

Note tool when acquiring and recollecting knowledge.

Teaching

Way of presenting material to pupils & students.

Platform for:

websites

presentations

databases

search engines

including ways of accessing information

Advocates of mind mapping can be role models of mind mapping applications.

Why do not websites on mind mapping use mind maps in more innovative ways?

My vision:

Mind maps as the preferred way of communicating on the internet.
